

ADT-02 Lasting Adhesive Tester

ADT-02 Lasting Adhesive Tester is applicable in the lasting adhesive testing of pressure sensitive adhesive tapes, adhesive bandage(plaster), adhesive labels and protective films, etc.

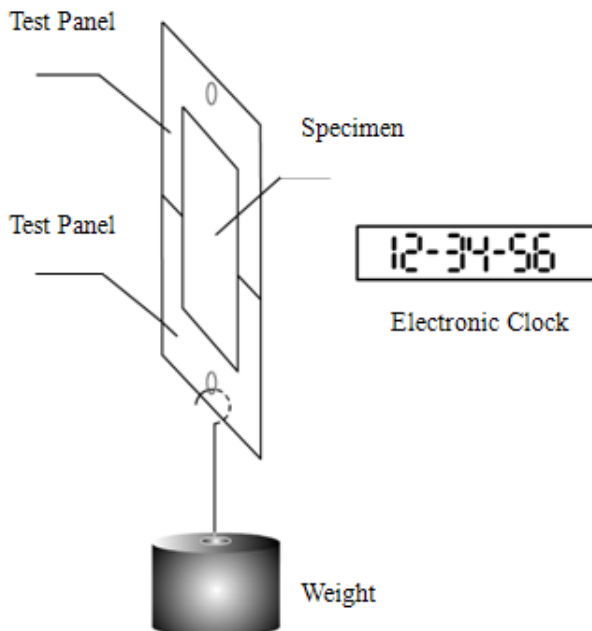

CHARACTERISTICS

Micro-computer control, LCD display;
Film keyboard; PVC operation board;
Automatic timing and lock;
Six-station design.

PRINCIPLE

Hang the panels covered by adhesive tapes onto the test shelf vertically, hang weight(s) on the low end of the panel, the weight is specified. After a certain period, test the displacement of the specimen, or test the time during which the specimen leave the panel totally to express the specimen ability to remain adhered.

TECHNICAL INDEXES

Standard Roller: 2,000g±50g

Weight: 1000±10g (including the load panel)

Test Panel: 60 mm (L) x 40 mm (B) x 1.5 mm (D)

Time Range: 0~100h (Standard)

0-10000h (Optional)

Work Station Quantity: 6

Dimensions: 600 mm (L) x 240 mm (B) x 400 mm (H)

Power: AC 220V 50Hz

Net Weight: 20kg

STANDARDS

ASTM D3654, JIS Z0237
