

# RUB-01 Rub Tester

RUB-01 Rub Tester is applicable in abrasion resistance test of printing works, light sensitive layer of PS boards, and coating layers of relative products. It can help users to analyze the affairs of lower abrasion assistance, ink layer falling-off, lower printable of PS boards, and rigid of coating layers of other products.

## CHARACTERISTICS

Micro-computer control, LCD displays data.  
film keyboard switch; PVC operation panel;  
Power failure memory;  
Built-in standard rub panel  
Mute-sounds design, even friction.

## TECHNICAL INDEXES

Rubbing Pressure:  $20 \pm 0.2\text{N}$   
Rubbing Speed: 43cpm  
Rubbing Area: 155 mm (L) x 50 mm (B)  
Rubbing Times: 0~999  
Specimen Size: 230 mm (L) x 50 mm (B)  
Power: AC 220V 50Hz  
Net weight: 22kg

## STANDARDS

GB 7706
